These bits are an ORed combination of the bit value shown and the next significant bit below. (This rounds the color value to nearest color.)

These bits do not get a substitute, and are defined by the pixel output mode in the upper part of the table.

* These bits do not get a substitute and are deemed to the values.

These bits are an ORed combination of the bit value shown and the next significant bit below. (This rounds the color value to nearest color.)

These bits do not get a substitute, and are defined by the pixel output mode in the upper part of the table.

* These bits do not get a substitute and are deemed to the values.
